Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 51 and 52, drawn to a pickup and/or a method of using a pickup, classified in class 294, subclass 64.3.
- II. Claims 18-26, drawn to a holder, classified in class 118, subclass 500.
- III. Claims 27-50 and 53-58, drawn to transferring a substrate to a workstation to treat both both sides, classified in class 414, subclass 222.01.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use to move any flat article. Invention II can hold any flat article and invention III can invert any flat article. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
